PROFESSIONAL CURRICULUM

Period: from 01/11/2020
Position/Role: Program Manager – DTT Project
Company: eni SpA/DTT Scarl
Department/Unit/business Area: Development, Operations & Technology
Country/Location: Italy/Frascati

Main tasks performed and related context:

Responsible for DTT Company and Project development, definition of execution strategies and organization;

Period: from 01/03/2017 to 30/10/2020
Position/Role: Development Project Manager - EST Technology
Company: eni SpA
Department/Unit/business Area: Development, Operations & Technology
Country/Location: Italy/Sannazzaro Refinery

Main tasks performed and related context:

EST is an unconventional and innovative hydrocracking process, developed by Eni, aimed to maximize the bottom-of-the-barrel-conversion (>90%).

Responsible for EST Complex Project development, definition of execution strategies and organization; oversee coordination and control of all engineering activities (in terms of their technical and qualitative aspects), starting from BDP to detailed engineering. Moreover he is responsible for the procurement of materials and construction, making sure that defined budget, execution time, quality, health, safety and environmental compatibility objectives are met for the project, up to the commissioning and start-up.

Period: from 01/01/2016 to 28/02/2017
Position/Role: Head of Project Execution Department – Rome Execution Centre
Company: Eniprogetti SpA
Department/Unit/business Area: Project Execution

Main tasks performed and related context:

Ensure the coordination of the engineering, process and technological competences assigned and put forward and implement the most technically and economically viable design solutions for the assigned projects during the execution phases.

Oversee assigned project technical management activities, coordination and control of engineering activities in terms of their technical and qualitative aspects and make sure that defined budgets, execution time, quality, health, safety and environmental compatibility objectives are met for each individual project and that technological and design risks and opportunities are properly evaluated.

Contribute, within remit, to the definition of project execution strategies, and propose competitive and efficient engineering execution plans.

Period: from 01/10/2014 to 31/12/2015
Position/Role: Commercial VP Infrastructures Business Unit (Head of Commercial)
Company: Saipem SpA
Department/Unit: Infrastructures Business Unit

Main tasks performed and related context:

Ensure the BU commercial coordination, direction and control, contributing in the achievement of Business Unit sale targets.

Ensure for the BU the overall knowledge of competitive positioning and evolution trends of relevant markets and technologies.

Ensure, on the basis of Company commercial strategies and business development plans, the definition of commercial and JV's agreements.

Ensure the management of commercial promotion activities of BU products aimed at gathering specific opportunities, directly managing the relations and promotion activities towards International Companies.

Period: from 30/10/2009 to 30/09/2014
Position/Role: Senior Manager – Project Execution Department Manager
Company: Saipem SpA

Main tasks performed and related context:

Ensure the management and the execution of the assigned Projects, guaranteeing that contractual and economics targets are met.

Ensure in setting up project organization for the project acquisition and execution.

Ensure the construction and fabrication activities, during acquisition and execution phase, guaranteeing the definition and application of the most suitable strategies for the project needs.

Period: from 01/04/2007 to 31/10/2009
Position/Role: Project Director
Company: Saipem SpA

Country/Location: Libya/Italy

Main tasks performed and related context:

Project: Mellitah Enhancement Project – Mellitah Plant - Libya

Client: Mellitah Oil & Gas B.V.

Onshore EPC LSTK Contract (Gas Treatment Facilities, Product: Sale Gas 695 MMSCFD; Stabilized Condensate 4300 t/d; LPG 550 t/d; Solid Sulphur 570 t/d). The Upgrading aimed at increasing the capacity of the existing plants about 15%.

Project: Enhancement of the existing Val d'Agri Oil Treatment Plant, Basilicata (Italy)

Period: from 13/05/2003 to 31/03/2007
Position/Role: Project Manager / Site Manager
Company: Snamprogetti SpA
Country/Location: Italy

Main tasks performed and related context:

Project: New High Speed Railway Milano-Bologna (Italy)

Client: TAV S.p.A.

Performed activities:
